FUNK FROM JUNK

Task

The competition will be of 2 rounds.

- 1. Collecting Junk from different places within the campus*
- 2. Making some useful technical product from the junk*

Arena

The competition will take place in a room. But the junk may be collected from the different places within the campus.

Event Rules

- 1. There will be a team of 3 students.*
- 2. In the first round 45 minutes will be given to the participants to collect junk from the college campus, which will be hidden by us at different places, and there will be clues given to find them. Each location will have different components.*
- 3. Then they will gather at the venue and in next 60 minutes, they need to make a sellable product from the junk. It has to be a technical item.*

Judging Criteria

The first one to complete the first round in the given time wins the round and will be given some extra time for the second round.

- All the other participants who will complete the first round will be moved to the second.*
- Points will be given for the first round.*
- The points from the second and first round will be added and the participant with the highest points will win.*

Provisions at Competition Site

The components given will include different electronic components like IC's PCB's, Breadboards, connecting wires, transformers, led, electric bulbs, LEDs, soldering iron etc.
