

## GREEN TECH

### ➤ Description:

Green tech plays an important role in creating environmental awareness amongst the future generation. Students are empowered and encouraged to make prototypes using waste materials preferably non-recyclable material. Green Tech will enable us to manage waste and use more of the useless materials.

### ➤ Rules:

- A team should consist of at least two and maximum three members.
- The theme selected should be significant and prototype should be prepared well in advance and display in front of judges.
- The teams can use the used and waste material for their creation or prepare the prototype for waste management.

### ➤ Judging Criteria:

- Judgment will be based on the aesthetic, stability, experimental results (if applicable), in-depth knowledge of the topic, and the presentation techniques adopted.
- Real life applicability (if applicable) will also be one of the judging criteria.
- The decision of the judges will be the final and no correspondence will be entered into

### ➤ Team size: 3 persons
