

Type of Event: Workshop

Name of the Event: Safety measures to be taken during covid-19 third wave:
Targeting children- Guaranteeing well being of all

Coordinator's Name and contact Details: Dr. Mahavir Joshi, Phone - 8194932100, email ID- biotech.mahavir@cumail.in

About the workshop:

The second wave affected the younger generation. Now that most adults are either infected or vaccinated, it is expected that children may be at a higher risk in the third wave. Also, if we see how the virus has mutated in all these months, the virus certainly impacts those who have not been immune to such transmissions. The workshop focuses on the safety measurement to be taken care during the 3rd wave of Covid-19.

Objective of the workshop:

1. Awareness among society for Covid-19 third wave.
2. To guide children about the safety measures to combat Covid-19 third wave.
3. Interaction of school students with doctors to prepare themselves against Covid-19.

Outcome of Workshop:

1. Awareness about the covid-19 situation.
2. Precaution to be taken during 3rd wave of covid-19.
3. Fast track clinical trials for vaccination among children
4. Educate children using creative material about Covid-19 safety, hygiene practices, and how the transmission happens
5. Monitor them at home
6. Ensure they eat healthy and home-cooked food

Key takeaways for the Participants:

Awareness about the 3rd wave of covid-19.

Benefits of the workshops:

1. E- Certification of participation.

Topics for the Workshop

1. Self monitoring
2. Doctor consultancy
3. Home remedial

General Guidelines

- At the end of the workshop participants are required to fill the feedback form for the betterment and learning.
