About the Workshop:

Automobiles need maintenance from time to time. Like humans are required to maintain hygiene, similarly automobiles also need to be kept clean. Automobiles have to run on dirty roads and in a polluted environment. They run on uneven roads with potholes and other obstructions, and are therefore subjected to loads which damage them. Therefore, there is a need for regular maintenance and servicing of automobiles, which is usually done in auto workshops or auto service stations.

Objectives:

- To make participants aware about the exciting opportunities that technology has been creating in the field of detailing.
- To make participants aware how technology has been impacting the people working in the respective fields.
- To enable students and other participants with technical skills for better career options.
- To gain knowledge on the standards of measurement and calibration of various automobile components.
- To gain knowledge of service techniques used for automotive vehicles.
- To analyze faults in the vehicles.
